

Composting – The Easiest Way to Go Green!

Composting...

- is nature's way of recycling fruit/vegetable scraps and yard trimmings into products for a healthier garden.
- improves the fertility of the soil.
- saves water by helping the soil hold moisture and reduce water runoff.
- benefits the environment by recycling valuable organic waste and extending the life of our landfills.
- pays for itself and saves money by making your own compost and fertilizer.

Compost Bins

Wiggly Wranch Worm Compost Bin

(Comparable Value = \$ 119.00)

Compost Tumbler

(Comparable Value = \$ 230.00)

Converts yard trimmings and fruit and vegetable scraps into compost for house and garden plants.

- Capacity:** 58 Gallons
Dimensions: 45" x 33 ½" x 33" (fully assembled)
Assembly: Easy to assemble and maintain
Material: 100% recycled material (green color)
Durable, sturdy, well built construction

- Features:** Stainless steel central breaker bar mixes & aerates to breakdown material faster
Tumbling action keeps the contents mixed well, creating organic compost faster
Sturdy galvanized tubular steel frame/legs that will not rust
2 interchangeable screw on lids with ventilation slots to keep compost well aerated
Can be placed on hard surface such as concrete or pavers
Spins vertically to maximize compost production
A daily spin will produce compost in as little as 21 days
Perfect for homes, condos, apartments, and schools

Member tested and recommended
by National Home Gardening Club

Soil Saver Base Only (Optional)

Base fastens easily together using two halves and screws provided
Soil Saver compost bin sits inside the raised lip on outermost edge of base
Base keeps burrowing animals out of compost pile
