

CCCSWA COLLECTION RFP

ADDENDUM #4

JANUARY 21, 2025

ALTERNATIVE BID WITH ADVANCED CLEAN FLEET REGULATIONS NO LONGER REQUIRED

Because CARB has withdrawn its request to the US EPA for a waiver to implement the Advanced Clean Fleets regulation, proposers are no longer required to submit an alternative bid for ZEV implementation (Alt 10 in the Alternative Bid cost forms). Note that the required base proposal is neutral in regard to vehicle fuel and requires all new vehicles on March 1, 2027.

Addendum #1 specified a base proposal without advanced clean fleet regulations and a required alternative bid with clean fleet regulations. The alternative bid with clean fleet regulations is no longer required. Proposers could still choose to submit an optional alternative proposal that includes ZEV's. Such a proposal would not have to utilize the ZEV implementation schedule previously required by CARB.

LIST OF ACCOUNTS WITH ON-PROPERTY SERVICE

Republic has provided a list of accounts with on-property (sideyard, backyard) service, [On-Property Service](#). There are a total of 944 accounts with on-property service: 892 single-family and 52 multi-family. 304 of the single-family on-property accounts are paying an extra charge in order to have their carts collected from their backyard or sideyard. All of the other on-property accounts receive on-property service at no additional charge due to disability. These accounts still pay the base service rates.
